## SET UP INSTRUCTIONS FOR ADJUSTABLE HEIGHT GROOMING TABLE

Congratulations on your purchase of the Southeastern Adjustable Height Grooming Table. This quality table was designed with a Pet Groomer's comfort in mind and is a great investment for those who spend many hours grooming their pets.

The Southeastern Adjustable Height Grooming Table has spring-loaded legs in order to facilitate the height adjustment of the table. As the pins are squeezed together, the springs are released and the legs shoot out from inside of the shaft.

1. Carefully remove the table from the box and unfold the legs from under the tabletop.
2. Make sure that the brackets are fully extended and are locked before standing the table on its legs.
3. ALWAYS adjust the height of the table with the legs pointed downwards.

4. NEVER adjust the height of the table with the legs pointed upwards or sideways. As the legs shoot out from inside of the shaft, they can cause injury or damage.

Failure to follow these instructions may result in damage or injury and voids Southeastern Products' warranty and liability.

This product has a one-year limited warranty as specified at our company's website.
